Tech Export Services Corridor (TESC) is an export support organization for Iranian high-tech and medium-tech companies. TESC facilitates the export process for Iranian manufacturers by providing services in the areas of marketing, consultancy, branding, certification, exhibition, technology transfer, and international alliances.

TESC chooses producers providing the highest quality products based on Export Readiness Assessment (ERA) basis and supports competent manufacturers for export. Therefore, TESC is capable of certifying the quality of products and reliability of Iranian producers in high-tech fields and creating a trustful environment for collaboration between Iranian and foreign companies.

#ABOUT COMPANY

Beginning its activity in designing and maintenance of medical equipment in 1990, The Avanteb founders group succeeded to build GHV-175 electro-surgery device for the first time in Iran which was successfully employed by the Vice-Chancellor in Treatment of Ahvaz Jundishapur University of Medical Sciences for Lumbar discectomy surgery in Golestan hospital of Ahvaz in the same year. The company has continued its activity changing its name to Avanteb Company since 1996.

Besides, Smart Ablation technology was produced by local Knowledge, for the first time in the world after the US, by Avanteb Company in 2011. Utilizing modern technology and applying quality management standards (ISO13485 and ISO9001) and receiving various approvals including the production license from Medical Equipment Administration, CE badge and other reliable centers, Avanteb has attempted at designing, producing and exporting a wide range of electro-surgery devices, Hi-tech accessories and operating room sterile packs.

Our goal, throughout two decades of activity, is reaching sheer satisfaction of the medical society and the best position in surgical equipment industry. We hope our honest endeavor in this serious way, contributes to promoting the name of Iran, our beloved homeland.

ADDRESS: No. 505, Isf. Science & Technology Town, Isf. University of Technology Blvd., Isfahan, IRAN

#ABOUT COMPANY

Behyaar Sanaat Sepahan has been manufacturing medical equipment since 2003. Based on the ingenious knowledge, Behyaar Sanaat has been trying to manufacture the advanced medical equipment for improving the treatment around the Asia. Nowadays Behyaar Sanaat Sepahan with around 150 employees has a strong potential in innovating the new technologies such as Optical lenses for medical purposes, Real time processing, X-ray generators, Heavy industry, and Nano composite materials and so on. Thanks to the Behyaar R&D section, we have the innovative products deriving from our ingenious knowledge. Investing in R&D, which is an indispensable part of our policy, has had a direct effect on our development. One of the most important hi-tech product of Behyaar is LINAC. It is important to know what is LINAC? It is a medical linear accelerator which is designed to treat the cancer tumors with the use of ionizing radiation. This accelerator can be used in Radiotherapy, which is known as a suitable method for treating cancer. The type of radiation is based on the high energy electrons or X-rays. As a matter of fact, the electrons are accelerated within the tube and extracted from the head of the machine. The beam of radiation can penetrate inside the tumor where cancer cells live. These kinds of cells can be killed by radiation, and finally the tumor will be eradicated. What is our motivation in manufacturing LINAC? According to the International statistics in 2012, about 14.1 million new cases of cancer occurred globally and It caused about 8.2 million deaths or 14.6 % of all human deaths. It seems that a lack of adequate equipment has increased the rate of death among people suffering from cancer. As an illustration, the dearth of radiotherapy machines such as LINAC is a controversial issue around the world particularly in developing countries. Last but not least, another hi-tech product of Behyaar is U-arm/Ceiling radiology system which is fully motorized and automated.

POOYANDEGAN Pezeshki Pardis (3P)

Pooyandegan Pezeshki Pardis

#ABOUT COMPANY

Pooyandegan Pezeshki Pardis (3P) as an Iranian company has started its activity in March 2007 in the beautiful province of Golestan, and in the city of Minoodasht. In 3P, we seriously believe in innovation and creativity along with the highest quality. In our company, due to the necessity of having the expertise from both medical and engineering disciplines, we are very fortunate to have a number of very professional Engineers, Bioengineers, and Medical doctors, who are closely working together to provide our very respected customers the highest quality implants, and also to make our company as one of the best in Iran and a well-reputed company in the world, in the near future.

Achieving the first rank at 3rd Iranian National Food, Drug's and Health Quality Award and 11th and 12th Sheikh-Bahai Technopreneurship Festival and selecting at 2015 as the Iranian Representative at SLUSH, the Europe's leading startup event are some of our honors.

Our main products are orthopedic implants like Bone Plates, Bone screws and Intramedullary Nails which are used as internal fixators to treat the fractured bone.

Syria, Lebanon, Iraq and Tajikistan are some of countries which we export our products to them and we are going to expand our markets in other CIS countries like Russia and also European countries.
